Name _____	Factor May 1 st _____
Address _____	Factor Sept 30 th _____
_____	_____
Phone _____	Reduction _____

Amateur- age 19 to 54 as of September 30th

Name _____	Factor May 1 st _____
Address _____	Factor Sept 30 th _____
_____	_____
Phone _____	Reduction _____

Senior- age 55+ as of September 30th

Name _____	Factor May 1 st _____
Address _____	Factor Sept 30 th _____
_____	_____
Phone _____	Reduction _____

How to Calculate Reduction

Take player's May 1st + 12 (Value A) e.g. Factor May1st 22.6+ 12 = 34.6 Value A

Take Players Sept 30th factor + 12 (Value B) Factor Sept. 30th 17.4+ 12= 29.4 (Value B)

Divide	$\frac{\text{Value A} = \text{reduction}}{\text{Value B}} = \frac{34.6}{29.4} = 1.177$
